

A MOMENTOUS AND VISIONARY GOAL

**REPLACING NUCLEAR AND FOSSIL FUELS
ENTIRELY WITH RENEWABLE ENERGY SOURCES**

EUROSOLAR, founded in 1988 as the European Association for Renewable Energy, conducts its work independently of political parties, institutions, commercial enterprises and interest groups. It is a registered non-profit organization dedicated to the cause of completely substituting for nuclear and fossil energy through renewable energy with the aim of preserving the global natural resources and enabling a sustainable economy.

EUROSOLAR acts to change conventional political priorities and common infrastructures in favor of renewable energy. Bringing together expertise from the local to the international level, the association promotes a broad-based socio-cultural movement. Get involved!

EUROPEAN NETWORK

CONNECTING PEOPLE ACROSS EUROPE FOR
A SUCCESSFUL ENERGY TRANSITION

With close links to national parliaments, local movements and organizations, the network of 13 EUROSOLAR sections guarantee that the goal of the renewable energy transition is reached across Europe.

ACTIVITIES

DEVELOPING, PROPOSING AND DISCUSSING TECHNICAL,
SOCIETAL AND POLITICAL FRAMEWORK CONDITIONS

EUROSOLAR develops political and economic plans of action and concepts for the introduction of renewable energies at international, national, regional and local level. Actions range from market launch strategies to proposals for future research and development policies, from tax breaks to conversion aided by solar energy, over the contribution of solar energy to the developing world to agricultural, transport and construction policies.

All political, scientific, technological and industrial expertise and grass roots commitments are important parts of EUROSOLAR's platform and produce guidelines, proposals and mandates for action.

EUROSOLAR arranges numerous high-profile conference series and exploratory meetings on the national, European and international levels such as the "International Renewable Energy Storage Conference (IRES)", "Practical Aspects of the Energy Transition" and "City Utilities using Renewable Energy".
